

## INAUGURATION OF GUARD HOUSE AT SANGAM-JAL VAYU VIHAR:

“Sangam Jal Vayu Vihar” is a beautified and redeveloped pond near Junior College in Anushaktinagar. The facility is a landmark creation for the Clean & Green, Anushaktinagar.

Around 1960, an existing natural water body was developed as collection/oxidation pond to store treated sewage water for gardening. Over the years pond & its surrounding became unhygienic with foul smell due to deposition of silt. DCSEM desilted, cleaned the pond & developed the surroundings. Around 20,000 M.T. of silt was removed. The Pond houses rich biodiversity. The area is now functioning as a recreation spot and very popular amongst residents of Anushaktinagar.

To witness the spot there is lot of public movement on daily basis and especially during holidays. To keep a security check CCTV camera for video surveillance are also installed in the premises. Considering these security reasons there was a need of security guard house. The facility was designed and executed by DCSEM.

The area of Guard House is around 11.44 sq.m with a provision of register counter and shelves arrangement for maintaining the records. It is provided with windows on three sides of the wall to have a security check on all the sides.

The facility has been inaugurated by Shri B.K. Jain, Director DCSEM on 7<sup>th</sup> October 2022.
